

Louisiana Healthcare Connections is committed to a partnership with its providers to help increase the rate of appropriate screening tests and comprehensive exams in order to maximize the health status of its members. Louisiana Healthcare Connections is also committed to help lower inappropriate ER utilization and maintain cost effective pharmacy utilization.

As part of this partnership, this **PROVIDER PRACTICE OVERVIEW** is being distributed to show each practice how they compare to the overall average of similar Louisiana Healthcare Connections primary care providers. Solo providers or groups with at least 250 members will automatically participate and receive the overview quarterly.

The overview will include the percentage of members in the practice that meets each requirement, the Louisiana Healthcare Connections plan average for the requirement, and the most recent National Medicaid NCQA 75th percentile rate. The overview also will include the state-mandated benchmark for any measure for which one exists. Providers will only receive a score for requirements that are applicable to their particular member mix.
